The frequent ME. and mod. dial. *clanse* may represent an OE. *clánsian* (cf. *cláne* under CLEAN), or it might be from *clænsian* with shortened *æ*, as *clense* from *clensian*. The mod. spelling *cleanse* seems to be artificial, assimilated to *clean*. This is the original vb., on the domain of which the recent *to clean* has intruded.

The type of verbs in *-isôn*, *-irôn*:—OTeut. *-isôjan*, *-izôjan*, appears to have started from verbs in *-ôjan* formed on *-s* stems, as Goth. *hatizôn*, OHG. *agisôn*, *sigirôn*. Cleavable (klī·văb'l), *a.* [f. CLEAVE *v.*[1] + -ABLE.] That can be cloven, cleft, or split; admitting of cleavage.

1846 WORCESTER cites *Penny Cycl.* 1856 RUSKIN *Mod. Paint.* IV. v. xviii. § 3 In large rocks the cleavable or frangible nature was the thing that necessarily struck him most. 1881 GEIKIE *Wyoming* in *Macm. Mag.* XLIV. 234 Pink cleavable orthoclase felspar.

Cleavage (klī·vĕdʒ). [f. CLEAVE *v.* + -AGE.]

1. The action of cleaving or splitting crystals and certain rocks along their lines of natural fissure; the state of being so cleft.

1816 CLEAVELAND *Min.* 9 The primitive forms of crystals can be ascertained only by mechanical division. This process, sometimes called *cleavage* by lapidaries, consists in separating thin layers or slices from the sides, edges, or angles of a crystallized substance in a given direction. 1831 BREWSTER *Optics* xvii. § 90. 145 We may by a new cleavage replace the imperfect face by a better one.

b. *Min.* Arrangement in laminæ which can be split asunder, and along the planes of which the substance naturally splits; fissile structure; the property of splitting along such planes.

1830 SIR J. HERSCHEL *Stud. Nat. Phil.* 291 The texture or cleavage of a mineral. 1869 ROSCOE *Elem. Chem.* 191 Crystalline bodies exhibit .. a peculiar power of splitting in certain directions more readily than in others, called cleavage.

c. *Geol.* *Slaty cleavage*: the fissile structure in certain rocks, especially in clay slate and similar argillaceous rocks, whereby these split into the thin laminæ or 'slates' used in roofing, etc. This structure is quite distinct from, and in origin posterior to, the stratification and jointing, the cleavage-lines crossing these at any and every angle, while parallel to themselves over extensive tracts of country.

1839 MURCHISON *Silurian Syst.* 574 The observation of Professor Sedgwick on the slaty cleavage of mountains. 1845 DARWIN *Voy. Nat.* vi. 116 A formation of quartz which..had neither cleavage nor stratification. 1860 TYNDALL *Glac.* 2, I learned that cleavage and stratification were ..totally distinct from each other. 1882 GEIKIE *Text-bk. Geol.* 121 This superinduced fissility or 'cleavage' has resulted from an internal rearrangement of the particles in planes perpendicular to the direction in which the rocks have been compressed.

d. (with *pl.*) The direction or plane in which a crystal or rock may be split.

1817 B. JAMESON *Char. Min.* 135 The cleavages are not parallel with any of the planes of the crystal. 1869 TYNDALL *Light* 73 By following these three cleavages it is easy to obtain from the crystal diamond-shaped laminæ of any required thinness.

2. *gen.* The action or faculty of cleaving or splitting asunder; the state of being cleft; division. *lit.* and *fig.*

1867 FROUDE *Short Stud., Erasm. & Luther* (ed. 2) 26 When differences of religious opinion arose, they split society to its foundation. The lines of cleavage penetrated everywhere. 1879 BARING-GOULD *Germany* I. 60 We lament, in England, the cleavage between the classes. 1886 SPURGEON *Treas. Dav.* Ps. cxliii. Introd., This psalm is divided by the Selah. We prefer to follow the natural cleavage, and therefore have made no other dissection of it.

3. *attrib.*, esp. in *cleavage-plane*.

1831 BREWSTER *Optics* xxv. 214 Analcime has certainly no cleavage planes. 1862 DANA *Man. Geol.* 55 A broad, even, lustrous cleavage-surface. 1875 DAWSON *Dawn of Life* v. 117 The loganite .. shows traces of cleavage-lines. 1878 GURNEY *Crystallog.* 8 Most crystals can be separated into

indefinitely thin slices, which are bounded by flat surfaces called cleavage-planes. 1882 GEIKIE *Text-bk. Geol.* II. II. § 6. 121 'Clay-slate' has generally been applied solely to argillaceous rocks possessing this cleavage-structure.

Cleave, *sb. Irish.* Also 6 cleefe. [ad. Ir. *cliabh* basket, cage, chest.] A basket. Hence **Cleaveful.**

1586 J. HOOKER *Girald. Irel.* in *Holinshed* II. 97/2 [He] wrapt the yoong patient as tenderlie as he could, and had him conueied in a cleefe with all speed to Ophalie. 1801 MAR. TUKE *Rept. Distrib. Seed Potato Fund*, Hugh C—..has only two or three 'cleaves' of potatoes in the world.

Cleave, var. of CLEVE, cliff, steep declivity.

Cleave (klīv), *v.*[1] Pa. t. **clove, clave, cleaved, cleft**; Pa. pple. **cloven, clove, cleaved, cleft.** Forms: see below. [Common Teut.: OE. *clīofan, clēofan*, pa. t. *clēaf*, pl. *clufon*, pa. pple. *clofen*, corresp. to OS. *kliōban* (MDu. *clieven, clīven*, Du. *klieven*), OHG. *chlioban* (MHG., mod.G. *klieben*), ON. *kljúfa* (Sw. *klyfva*, Da. *klöve*), not recorded in Gothic:—OTeut. type **kleub-, klaub—klubum, klubano-*, corresp. to pre-Teutonic **gleubh-*, in Gr. γλυφ- 'to cut with a knife, carve', and perh. L. *glūb-* 'to peel, flay'.

The early ME. inflexion was *cleoven* (*clēven*); *clēf* (pl. *cluven*), *cloven*. Assimilation to the pa. pple. soon changed the plural of the pa. t. to *cloven, clove*, and by 14th c. *clove* was extended to the singular, where *clēf, clēve*, became obs. about 1500, making the later inflexion *clēve, clōve, clōven*. The pa. pple. had also the shortened form *clove*, which survives as a variant in poetry. A pa. t. *clave* occurs in northern writers in 14th c., passed into general use, and was very common down to *c* 1600; it survives as a Bible archaism. A weak inflexion *cleaved* came into use in 14th c.; and subsequently a form *cleft*; both are still used, *cleft* esp. in pa. pple., where it interchanges with *cloven*, with some differentiation in particular connexions, as 'cleft stick', 'cloven foot': see these words.

From the 14th c. the inflexional forms of this verb have tended to run together with those of CLEAVE[2] 'to stick'. Though the latter was originally *clīve*, it had also the variants *cleove, clēve*, the latter of which at length prevailed; the two verbs having thus become identical in the present stem were naturally confused in their other inflexions. The (originally northern) pa. t. *clave*, which appeared in both in 14th. c., is not normal in either; it was apparently analogical, taken over from one of the other classes of strong vbs. having *a* in the past, as from *breke, brak(e, broken, speke, spak(e, spoken*. (It would of course be possible to explain the pa. t. singular *clove* in the same way.) The weak pa. t. and pa. pple. *cleaved* were probably mainly taken over from CLEAVE[2], where they were original; but they might also arise independently in this verb. For the subsequent shortening of *cleaved* to *cleft*, there was the obvious precedent of *leave, left, bereave, bereft*, etc.]

CLIMB, CLAY, CLAM. Of this str. vb. OE. shows only a few examples of the present, its place being generally taken by (2) the derivative *clifian*, corresp. to OS. *clībon* (MDu. *clēven*, Du. *kleven*), OHG. *chlebên* (MHG. and G. *kleben*):—OTeut. **klībôjan*, f. weak stem *klīb-* of the strong vb. This had in OE. the variants *cliofian, cleofian* (with *o* or *u* fracture of *i*; cf. *lifian, leofian*, to live, Sc. *leeve*), whence in ME. *clive*, and *clēve, cleeve*; the latter finally prevailed, and is now written *cleave*. Instead of the normal pa. t. and pple. *clived, cleved*, we find also from 14th c. *clave*, occas. *clef, clof, clove*, and in 17th c. *cleft*; in the pple. *clave, clove*, and *cleft*. At present *cleave, cleaved*, is the ordinary inflexion, but the influence of the Bible of 1611, in which *clave* is frequent (beside, and in the same sense as, *cleaved*), has made that an admissible form: *clove, cleft* are now left to CLEAVE *v.*[1]

The final predominance of *cleve* rather than *clive* as the ME. form made the present stem identical in form with that of CLEAVE *v.*[1] to split. Hence their inflexional forms were naturally also confused, and to some extent blended or used indiscriminately. The pa. t. *clave* attached itself in the 14th c. to both; in this verb it corresponds to the original strong pa. t. **clāf*, but does not appear to be continuous with it; it was prob. a new form due to analogy: see note to CLEAVE[1]. The occasional pa. t. *clef* belongs properly to CLEAVE[1]; as perhaps also *clof, clove*. (The occas. pa. pples. *clave, clove*, are from the pa. t.) The weak inflexion *cleaved* is of course proper to this verb, and prob. was transferred hence to CLEAVE[1]. The shortened *cleft* found in both, appears to be due to the analogy of *leave, left, bereave, -reft*. To the same analogy is probably due the mod. spelling *cleave* in both verbs: this is not etymological, for both words had close *e* in ME., and would properly now be *cleeve* or *clieve*.]

Cledge (kledʒ). [Of doubtful origin: probably connected with CLAG, as an umlaut derivative of same root.

If *cledge* went back to OE., its form would be *clecg*:—original **clagja-*, or *clagjo-*; cf. *edge*, *hedge*. The latter correspond to Ger. *eck(e*, *hecke*, and it is possible that the analogue of *cledge* is *kleck*, *klecke* in sense 'heap of dirt, sticky mass'; see *kleck* 2 *a*, in Grimm. Connexion with CLAY, OE. *clǽġ*, is excluded by the fact that there the ġ represents not palatalized *g*, but original *j* (*y*), *klaijo-*.]

[Commonly believed to be f. *clere*, CLEAR + STORY stage of a building, 'floor' of a house. (*Clere* must here have meant 'light, lighted,' since the sense 'free, unobstructed' did not yet exist: see CLEAR *a.*)

This assumed derivation is strengthened by the parallel *blind-story* (see BLIND *a.* 16), although this may have been a later formation in imitation of *clere-story.* The great difficulty is the non-appearance of *story* in the sense required before *c* 1600, and the absence of all trace of it in any sense in 14th, 15th, and chief part of 16th c. At the same time there is a solitary instance of *storys* in R. Glouc. (1724) 181, which may mean 'elevated structure' or 'fortified place'. The sb. *estorie* in OF. had no such sense, but the pa. pple. *estoré* meant 'built, constructed, founded, established, instituted, fortified, furnished, fitted out', whence a sb. with the sense 'erection, fortification' might perhaps arise.]

6. Old Law. *Benefit of* (*his*) *clergy*, also simply (*his*) *clergy*: orig. the privilege of exemption from trial by a secular court, allowed to or claimed by clergymen arraigned for felony; in later times the privilege of exemption from the sentence, which, in the case of certain offences, might be pleaded on his first conviction by every one who could read. Abolished, after various earlier modifications, in 1827. Cf. NECK-VERSE.

The ability to read, being originally merely the test of the 'clergy', or clerical position, of the accused, came at length to be in itself the ground of the privilege, so that the phrase became = 'benefit of scholarship' (sense 5, instead of 1).

Cleric (kle·rik), *a.* and *sb.* [ad. late L. *clēric-us* clergyman, priest, prop. an adj. 'of or belonging to the *clērus*'; a. Gr. κληρικ-ός 'of or pertaining to an inheritance', in later (Christian) use 'of or belonging to the ecclesiastical or sacerdotal order', f. κλῆρος 'lot, allotment, piece of land, estate, heritage', used in 2nd c. as a name of the ministerial or sacerdotal order in the church, the clergy. The Greek words were adopted in Latin in this transferred sense only (*clērus* in Tertullian *a* 220, *clēricus* in Jerome 4th c.), with which they passed into Romanic and English. Cf. Clerk.

On the history of the application of κλῆρος to the Christian ministry, see Bp. Lightfoot *Philippians* (1868) 245-6, where its probable origin is seen in the use of the word in Acts i. 17, τὸν κλῆρον τῆς διακονίας ταύτης 'the lot of this ministry'; cf. i. 25. In the time of Jerome, explanations were sought in the use of κλῆρος in Deut. xviii. 2, compared with ix. 29, and parallel passages; and 1 Peter v. 3 was interpreted in this sense. Jerome's explanation is thus repeated in the *Apology for the Lollards* (*c* 1400) 43:

'The clerk..schuld interpret þe calling of his nam, and enforce to be þat he is seid; for a clerk in our speche is seid *sort*, and þer for are men seid *clerkis*, for þei are of þe Lordis sort, or for þe Lord is þer part; and for he is þe Lordis part, or haþ þe Lord his part, he au[h]t to haue him s[u]ilk þat he haue þe Lord, and be had of þe Lord.']

Pr. *clerc*, *clergue*, *clerge*, Sp. *clerigo*, It. *chierico*): see Cleric. The original sense was 'man in a religious order, cleric, clergyman'. As the scholarship of the Middle Ages was practically limited to the clergy, and these performed all the writing, notarial, and secretarial work of the time, the name 'clerk' came to be equivalent to 'scholar', and specially applicable to a notary, secretary, recorder, accountant, or penman. The last has now come to be the ordinary sense, all the others being either archaic, historical, formal, or contextual.

The pronunciation klāɹk is evidenced in the south of England from the 15th c.; cf. *bark, hark, dark*, etc., from earlier *-er*; also *serjeant, hearth, Cherwell, Hertford*, and the 15–17th c. *clargy*. The dialects, esp. the northern, have retained the *e*, as Sc. klerk, klerk. In U. S. the pronunciation is klēɹk, and of late this has become somewhat frequent in London and its neighbourhood.]

b. Hence, since the Reformation, applied to laymen who perform such of these offices as are retained in cathedrals, churches, or chapels. In the Prayer-book of 1549 *the Clerks* were the choir men; in later times, *the Clerk*, or *Parish Clerk*, is the lay officer of a parish church, who has charge of the church and precincts, and assists the clergyman in various parts of his duties, *e.g.* by leading the people in responses, assisting at baptisms, marriages, etc. In other senses, usually with some distinctive epithet, as *Bible Clerk*, a scholar who reads the Scripture lessons in some ancient college chapels; *Lay Clerk*, a singing man in some cathedrals and college chapels; *Singing Clerk*, etc.

Clever (kle·vəɹ), *a.* Also 3, (8– *dial.*) **cliver**, 7 **cleever**, 7–8 **cleaver.** [Early history obscure: app. in local and colloquial use long before it became a general literary word. A single example of *cliver* is known in ME., but the word has not been found again till the 16th c., and it appears not to have been in general use till the close of the 17th, since Sir Thos. Browne specially mentions it as East Anglian, and Ray explains it among his dialect words. Outside Eng., Koolman gives EFris. *cliifer* (from *clifer*), clever, skilful, alert, ready, nimble, and *klöver, klever* is used in same

sense at Ribe Stift in Jutland (Molbech). The early example suggests relation to ME. *clivers* 'claws, talons, clutches', in the sense 'nimble of claws, sharp to seize', and the 16–17th c. examples (also of *cleverly*) show it connected with the use of the hands, a notion which still remains in the general sense of *adroit, dexterous*, having 'the brain in the hand'. Cf. also CLEVERUS. *Clever* appears to have come into general use about the time that *deliver*, formerly used in the sense 'expert', became obsolete, but there is no trace of any influence of the one upon the other. The sense-development has analogies with that of *nimble, adroit, handy, handsome, nice, neat, clean*.

Climb (klәim), *v. Pa. t.* and *pple.* **climbed** (klәimd); *arch.* **clomb** (klōum). [OE. *climb-an, clamb* (*clomb*), *clumbon, clumben*, corresp. to OHG. *chlimban*, MHG. *klimben, klimmen*, MDu., MLG., Du., LG., Ger. *klimmen*:—WGer. **klimban*. Believed to be a nasalized form of OTeut. **klîban* (see CLEAVE *v.*^{2}), the *m* being perh. originally a characteristic of the present stem, which has been extended to the other parts, and has carried the vb. from the ablaut series of *î, ai, i*, into that of *im, am, um*. Hence the sense-development 'cleave, adhere to, get up by clinging or adhering'; for which cf. OE. *clîfan* to cleave, cling, MDu. *clîven* to cleave, stick, also to climb, ON. *klîfa* and ME. *clīven* to climb. In all the modern langs. the *b* is lost in pronunciation, and in most in spelling also; but in Eng., although *climme, clime*, formerly prevailed, the spelling now recognized is *climb*. In most of the dialects the *i* is short, *clim*; but the standard language, like east midland and eastern, has the *i* long (klәim), the vowel being lengthened before *mb*, app. as before *nd* in *bind, find*, etc. (But clear evidence of the long vowel has not been found before the 16th c.) The original strong inflexions also remain dialectally (notably in Sc. *clim, clam, clum*), but in the south, weak forms appeared already in 13th c., and prevail in 16th c. prose; no others occur in Shaksp. or in the Bible of 1611. But the Elizabethan archaists affected a pa. t. and pple. *clome, cloame, clōmbe*, which they appear to have taken from Chaucer or Lydgate, and mistakenly pronounced with long *ō*. (In the ME. *clomb(e, o* was either short, as a variant of *clamb*, or more usually a graphic expedient for *u* before *m*; and in the dialects in which *clom* has come down the *o* is short.) From Spenser and his contemporaries, *clōmb* passed into later poetry, and occasionally appears in prose, especially in writers familiar with the strong *clam, clom*, or *clum* in dialect use.]

A. Forms.

(From the ambiguity of the spelling it is often uncertain whether *climbe, clymb, climb, clyme*, in 15–16th c. meant (klim) or (klәim), and whether *clomb(e* in 16–17th c. meant (klǫm) or (klōum).)

Clink, *sb.*[2] [The evidence appears to indicate that the name was proper to the Southwark 'Clink', and thence transferred elsewhere; but the converse may have been the fact. [Meaning and origin uncertain. The Glossary to first ed., professedly based on Spenser's authority, explains it as 'key-hole'; for the word in such a sense no etymology is known, and the reference to *clicket* is quite erroneous. Some identify the word with Du. *klink,* Ger. and Da. *klinke,* Sw. *klinka,* (also Fr. *clinche, clenche*) 'latch of a door'. Cf. also '*clink,* a small or fine crack'. ADDY *Sheffield Gloss.* 1888.]

Clink (klĭŋk), *v.*[1] Forms: 4 klynk(e, 4-6 clynk(e, 6-7 clinck(e, clinke, 6- clink. [A weak vb. found, with the sb. of same form, only from 14th c. Du. has a strong vb. of identical form, *klinken* (MDu. *klincken* and *klinghen*) 'to sound, clink, ring, tinkle', for which HG. has the str. *klingen,* OHG. *chlingan,* LG. *klingen,* EFris. *klingen* (*klung, klungen*) 'to ring, sound', and *klinken* (*klunk, klunken*) 'to clink glasses', WFris. *klinckjen, klingjen.* Also Sw. *klinga* str. (OSw. also *klinga, klinka* weak), Da. *klinge* str. 'to sound, ring', *klinke* 'to clink glasses'. Thus there appears a double stem-form, *kling-, klink-,* evidently (like the Lat. and Gr. words cited under CLANG) of echoic origin; one of these forms was prob. a later modification (? perhaps expressing a variety of sound); the evidence appears to favour the priority of *kling-.* No trace of either form has yet been found in OE. (where there is a strong vb. *clingan* in an entirely different sense: see CLING *v.*), and thus we cannot tell whether ME. *clinken* went back with the Du. to an OLG. **klinkan,* or was of later adoption or origination in England. Cf. the still later CLANK, and its correspondence with Du. *klank.* The sense-development is greatly parallel to that of *clank*; the transition from sound to sudden action is a common one, esp. in Sc.; cf. *bang, boom, bum, chop, clank, clap, pop,* etc.

Some of these may be compared with the corresponding use of CLANK *v.* 6, *clink down* being a sharper and less noisy act than *clank down*; but in most there seems to be an instinctive association with CLEEK, CLICK, CLITCH, *to clink away, clink up,* being to *cleek away* or *up,* with a sudden and deft action.

Clock, *sb.*¹ Forms: (1 cluege), 4–5 clok, clokke, clocke, 6 klocke, 6– clock. [OE. *cluege* (or *cluccge*) is found only once, and has no historical connexion with the extant word which goes back app. only to the 13–14th c. ME. *clok(ke*, *clocke*, was either a. MDu. *clocke* (mod.Du. *klok* 'bell, clock'), or a. ONF. *cloke*, *cloque* = Central Fr. *cloche* 'bell'. The Du. is cognate with OFris. *klocka*, *klocke*, EFris. *klokke*, *klok*, MLG. *klocke*, LG. *klokke*, *klokk*, *klok*, OHG. *glocka*, *klocka*, *glogga*, MHG. *glocke*, *klocke*, *glogge*, Ger. *glocke* 'bell', ON. *klocka*, later *klukka* 'bell', Norw. *klokka*, *klukka*, Sw. *klocka*, Da. *klokke* 'bell, clock'. The French *cloque*, *cloche*, with Pr. *cloca*, *clocha*, Piedm. *cioca*, descends directly from late L. *cloc(c)a* (8th c.). In all the prec., as in OE. *cluege*, the word is fem.; but in Celtic, OIr. *cloc* (genit. *cluic* :—**cloci*), Irish *clog*, Gael. *clag* (genit. and pl. *cluig*), Corn. *cloch*, Bret. *kloc'h*, 'bell', are masc.; only Welsh *cloch* is fem., and its pl. *clych* points perh. to an earlier masc.

Known since about 8th c. in Merovingian L., in Celtic, and in Teutonic; early diffusion app. connected with that of Christianity in western and northern Europe; not found in the southern Romanic langs. where *campana* is the word for 'bell'. Locality of origin undetermined: some refer it, on historical considerations, to Celtic; some think it possibly connected with OHG. *cloccôn*, *chlocchôn*, MHG. *klocken* 'to strike, knock'; but the variant forms in OHG. point rather to its being foreign. Wherever it actually arose, it was prob. echoic, imitating the rattling made by the early handbells of sheet-iron and quadrilateral shape, rather than the ringing of the cast circular bell of later date. The relation of the rare OE. *cluc(c)ge* to the other forms, which agree generally with the types *klok*, *klokka*, is obscure.

For the original and general sense of this word in the other langs., English had the word BELL in regular use; it is probable, therefore, that *clock* was introduced either with striking clocks, or at least with bells on which the hours were mechanically struck; it was prob. never prevalent in ME. in the mere sense 'bell'.]

† **1.** A bell (the sense of OE. *cluege*; in ME. prob. only as a retention of the Fr. use). *Later*, the gong of a striking watch. *Obs.*

2. An instrument for the measurement of time; properly, one in which the hours, and sometimes lesser divisions, are sounded by strokes of a hammer on a bell or similar resonant body; but many clocks now do not strike. The mechanism consists of a train of wheels set in motion by weights or a spring, actuating and regulated by a pendulum or balance-wheel, and requiring to be periodically wound up; the passage of hours, minutes, etc., is indicated by 'hands' or pointers, on a 'face' or dial-plate.

(The precise meaning in the earliest quots. is not certain.)

Cloff (klɒf). *Commerce.* Also *erron.* clough. [Origin obscure. Identity with CLOVE, the weight, has been suggested. Cf. also CLEF.] An allowance (now of 2 lbs. in 3 cwt., or $\frac{1}{168}$), given with certain commodities, in order that the weight may hold good when they are sold by retail.

According to Grafton, 1568, cloff was the grocer's name for the fixed allowance made to the buyer in lieu of the variable advantage which he formerly had through the inclination in his favour of the King's Beam, a practice abolished in 1269. (See also the *Ordinance of Staples*, 1353, c. 10.) But there is a long gap between 1269 and 1502, when our quotations begin. Fabyan, whom Grafton copies verbatim for his text, has no mention of *cloff*.

1502 ARNOLDE *Chron.* 128 Wherof .. shulde be rebated for the tare of euery of the said xij. bales iiij. ll. and for the cloff of euery off the said xij. bales ij. ll. .. and for the tret of ye same peper C. xxxvij. ll. 1568 GRAFTON *Chron.* (*Hen. WILLSFORD *Scales Commerce* I. 1. 24 Cloffe .. is onely an allowance for the refuse of the commodity, which hangs upon the chest or cask, for which is usually allowed but 3 or 4 pound in every parcel. 1828 HUTTON *Pract. Arithm., Tare & Tret*, Cloff is an allowance of 2 lb. for every 3 cwt., and some say for every 100 lb. of tret-suttle, to make the weight hold good when sold by retail.

(Cockayne understood the OE. name to mean *Ranunculus sceleratus*; which is probable, since both *clufþung* and *clufwyrt* are glossed by *Batrachion*, an old name of *Ranunculus*. But the ME. name seems to mean a hellebore, as in Halliwell's modern entry.)

Close (klōuz), *v.* Forms: *a.* 1 clýsan, 3 clusen; *β.* 3– close, (4 klose, 5 cloose, 7 cloze, *north.* 5–6 cloyse, 6 cloise, clois(s). [ME. *close-n* (13th c.), a. OF. *clos-* stem (*close* pres. subj.) of *clore*:—L. *claud-ĕre* to shut, close. OE. had already the vb. *clýs-an*, f. *clús*(*e*, a. late L. *clūsa* = *clausa* 'shut or enclosed place'. This came down to 13th c. in form *cluse-n* (*ii*), and probably *close-n* was at first viewed simply as a frenchified pronunciation of this earlier word: cf. *biclusen*, BECLOSE.

In French *clore* is of little importance, having been almost superseded by *fermer*:—L. *firmāre*, to make firm or fast, to fasten. In English, on the other hand, *close* and its accompanying adj. and sbs. have become great and important words, developing whole groups of senses unknown to French.]

I. To stop an opening; to shut; to cover in.

1. *trans.* To stop up (an opening or channel) so that it ceases to be open or to allow of passage. Where the opening is provided with a gate, door, or lid, turning on hinges or sliding, to 'shut' this is to close the opening; hence 'close' and 'shut' become to a certain extent synonymous, as in 'shut' or 'close the door, the eyelid', etc.

Close is, however, a more general word, to *shut* being properly only a way of closing; hence the former is generally used when the notion is that of the resulting state, rather than the process.

b. *To close* is also applied to the place, chamber, vessel, etc., to which the opening leads, or the thing which the lid shuts up, as in 'to close (or shut) a box, the eyes, a book', 'to close a room'. In reference to places, *close* usually means that access to them is officially stopped for the time, as 'the Bodleian Library is closed for a week', 'the grounds are closed to the public'. (In this sense *shut up* is colloquially used.)

Cloth (klɒ̄þ), *sb.* Forms: 1 cláð, 1-4 claþ, 3 cloð, 4 cloþ, 4- cloth, (4 cloþt, 4-5 cloþe, clooþ, clooth, 5 cloiþ, 4-7 clothe, 6-8 cloath). *North.* 3-5 clath, 4-5 klath, clathe; *Sc.* 5-6 clayth, -t, 5- claith. Also 4 cleth. [OE. *cláþ*, corresp. to OFr. *klâth*, *klâd*, *klêth* (mod. Fris. Saterl. *klâth*, NFris. *klâid*, WFris. *klaed*, EFris. *klêd*, Wangaroog. *klêt*); MDu. *cleet*, pl. *clêde*, Du. and LG. *kleed* (*klêd*), MHG. *kleit* (*kleides*), Ger. *kleid*. Unknown in OS., OHG., and Gothic; its general diffusion through the German dialects appears to date about the middle of the 12th c. The ON. form *klæði* (whence Norw. and Da. *klæde*, Sw. *kläde*) does not correspond in vowel or ending to the WGer. (which would require *kleið* in ON.); its history is obscure. Beside OE. *cláþ*, which was the source alike of midl. and south. *cloth*, *clothes*, and north. *clath*, *claith*, pl. *clathis*, *claise*, a form *cláþ* is recorded once (see 1 below); if genuine (which is doubtful), this may be the source of the north. ME. *cleth*, *clethis*, *clese*, which have otherwise been referred to a Norse origin.

The original pl. *cláðas*, is directly represented by the existing CLOTHES, q.v.; this (klōuðz) is now restricted to the sense 'garments'; for other senses, *cloths* has gradually come into use since *c* 1600, though the complete differentiation of *clothes* and *cloths* belongs to the 19th c., *cloaths* being a prevalent spelling of both in the 18th c. The pronunciation of *cloths* varies: northerners generally say klɒ̄þs, or klɒ̄þs; Londoners usually klɒ̄ðz, esp. in senses 1-8, though some reduce it to -klɒ̄þs in combination, as in *table-cloths*, *neck-cloths*; many would say klɒ̄þs, or klɒ̄þs, meaning 'kinds of cloth' (see II).

The etymology and even the primary sense of OTeut. **klaiþ-* are uncertain. The former is prob. to be sought in the Teut. vb. stem *klī-*, *klai-*, to stick (CLAY, CLEAN, CLEAM), but whether the name was applied to *cloth* as a substance felted or made to stick together, or to *a cloth* as a thing to be attached or made to cling to the body, is doubtful. The earliest known uses of OE. *cláþ* are not for the material (a sense hardly evidenced in OE.), but for 'a cloth' as a thing to wrap or wind about the body; from this primitive rudiment of attire, we pass naturally on the one hand to the more fully developed 'clothes' or garments, and on the other to the material of which all such articles are composed.]

II. As a material: Without *a* in *sing.* (except when meaning 'a kind of cloth', in which sense 'cloths' occurs in pl.).

9. A name given, in the most general sense, to every pliant fabric woven, felted, or otherwise formed, of any animal or vegetable (or even mineral) filament, as of wool, hair, silk, the fibres of hemp, flax, cotton, asbestos, spun glass, wire, etc. But when used without qualification or contextual specification, usually understood to mean a *woollen* fabric such as is used for wearing apparel. Here again, it is sometimes specifically applied to a *plain-wove* woollen fabric, as distinguished from a *twill*.

To this most specific sense belong the terms BROAD-CLOTH and NARROW-CLOTH, q.v., the ordinary *black-cloth* used for 'dress' clothes, clerical attire, etc., and the blue, scarlet, green, or other 'cloth', of uniforms and liveries...

Clothes (klōuðz), *sb. pl.* Forms: 1 clāðas, 2–3 claþes, 3–4 cloþes, 3– **clothes**, 6–8 cloaths, (*north.* 3–6 clathes, -is). Also 5–6 (*dial.* –9) close, (5 cloysse, 6 cloese, 7–8 cloes; 5 *north.* clase, *Sc.* 6 clais, 8 clayis, 8–9 claise, CLAES; also 4–5 clethis, clese. [The original plural of CLOTH:—OE. *clā-ðas*, ME. *clō-thes*; the *ō* remaining in the (originally) open syllable, and the *þ* becoming *ð* between vowels, as in *clothe* vb., *clothing*, etc., and subsequently changing final *s* to *z*: cf. *truth, truths, staff, staves*, etc. As the singular *cloth* is not now used in the sense of 'a garment', and has received a new plural *cloths* for its extant sense, *clothes* remains a collective plural, without a singular; to express the latter, a phrase, such as 'article of clothing', or another word, such as 'garment', is used.

The distinction *cloths, clothes*, is chiefly of the 19th c. The ordinary 18th c. spelling was *cloaths* (pronounced with *ð*), as in *cloath* = CLOTHE vb.

Almost immediately after the reduction of the ME. dissyllabic form to one syllable, by change of *-es* to *-s*, the *ð* began to disappear in pronunciation in all the dialect types, as shown by the spellings *close, cloes*, etc. (from *clothes*), *clase, clais(e, claes*, etc. (from north. *clathes*), *clese* (from *clethes*). These forms are still dialectal, and *close* (klōuz) is frequent as a vulgar or careless pronunciation of *clothes*. All these phenomena are paralleled in other Germanic dialects, e. g. MHG. *kleit*, pl. *kleider*, MDu. *cleet*, pl. *clēde*, EFris. *klēd*, pl. *klēr* (for *klēder*), WFris. *klaed*, pl. *klean*, NFris. *klāid*, pl. *klūe*, Saterland *klāth*, pl. *klōder*, Wangeroog *klēt*, pl. *klōder*.

The Lancashire pronunciation *cloof* (cf. *enoof* = *enough*) has given rise to an erroneous notion that this word is related to Icel. *klofi* or Du. *kloof* 'cleft, rift', with which it cannot possibly have connexion. The phonetic history and dialect forms clearly show that it is parallel to *bough, enough, plough, tough*, etc., from OE. *-óh*. That *clóh* existed in OE. is also shown by the numerous ancient proper names in *Clough-, -clough, -cleuch*. The parallel OHG. *klâh* in *Klâh-uelde* (Foerstemann II. 371) confirms the view of the Rev. A. L. Mayhew (*Academy*, 31 Aug., 7 & 21 Sept. 1889) that OE. **clóh* represented an OTeut. **klâh-* from *klanχo-*, and thus stood in ablaut-relation to Ger. *klinge*, OHG. *chlingo*, a clough (pre-Teut. root **glenk-*); cf. The OE. points to an OTeut. **klúto-z*, pre-Teut. type **glūdo'-s* from same root as CLOT, CLEAT (:—**gludo'm*, **glau'dom*). The original sense would therefore be something like 'lump, piece of stuff'; from an early period the word has been applied especially to a patch or piece of cloth, and so to *a cloth* (CLOTH 1-3) in a somewhat depreciatory sense. But sense 2 retains some of the original wider meaning, and relationship with CLEAT. It has been doubted whether sense 7 belongs to this word, though a parallel develop-ment of sense is found under CLOD.]

The phonetic history of the word in English contains points of difficulty. Originally *clowe*, *cloue* was, like the Fr., undoubtedly (klū), which would in due course have become *clow*. It is surmised that in the 15–16th c. spelling *cloue*, *u* was taken to mean *v*, as in *moue*, *loue*, etc. (cf. APPROVE *v.*2); but it is not known how such a change in the spoken word occurred as to give the modern pronunciation, which is perh. already indicated by the 15th c. spelling *cloyfe* (=*clōve*), is suggested by the pl. *close* in 1555, and is implied in the Shaks. quot. of 1588.]

Clow (klau), *sb.*[1] Forms: α. 3 (*dative*) cluse, 5–6 clowse, clowze, clouse, *pl.* clousis, clowses, 9 *dial.* cloose. β. *pl.* 5 clowys, 6– clowes, 9 cloughs; *sing.* 5 clowe, 7–9 clow, 8–9 clough; *dial.* clow, clew. [*Clow* is a false singular formed upon *clowes*, *clowis*, taken in 15–16th c. for a plural, but originally a singular, in ME. *clowse*, *clowze*, early ME. *cluse*, OE. *clúse*, a. late L. *clūsa*, var. of *clausa*, lit. a closed or shut

place or way. Du Cange has, among other senses, 'agger in quo concluduntur aquæ'. Hence, also, OHG. *chlûsa*, MHG. *klûse*, *klûs*, mod. Ger. *klause*, in Bavaria and Tirôl, a dam on a mountain stream for floating timber; *klaus*, in Rhineland, a mill-dam, also dial. a sluice. So MDu. *clûse*, Du. *kluis*.

The OE. *clûs*, *clûse*, is recorded in the senses 'enclosure', 'narrow pass', but not in that of 'dam', 'lock', or 'sluice', though 'dam' appears already in Ancren Riwle in 13th c. In the 18th c. *clow* began to be erroneously spelt *clough*, by engineers, etc., either through erroneous identification with CLOUGH *sb.* 'ravine', or by association with *plow*, *plough*. In some of the dialect glossaries it is spelt *clew*, meaning klū. An unexplained *clowre*, *cloor*, is found in Catholicon Anglicum, and northern dialects.

A compound of L. *clūsa* was *exclūsa* (in Gregory of Tours; in med.L. *sclūsa*, *slūsa*), giving OF. *escluse*, F. *écluse*. Hence Sc. CLUSS, *clush*; OF. gave MDu. *sluyse*, Du. *sluys*, whence Eng. *sluice*, LG. *slūse*, Ger. *schleuse*. Thus *clows* and *sluice* are ultimately closely related.]

Clown (klaun), *sb.* Also 6 cloune, cloine, cloyne. [Appears in Eng. in second half of 16th c. as *cloyne* or *cloine*, and *clowne*. The phonetic relation between these is difficult to understand; the former is esp. obscure: possibly a dialect form. By Dunbar, the word (if indeed the same) is written *cloun*; but it rimes with *tone*, *Joun*, meaning *tune*, *June*, both having in Sc. the sound *ü* (or *ö*), which would imply (klün). Words identical or closely related appear in several of the cognate langs. and dialects: *e.g.* NFris. (Moringer dial.) '*klönne* (or *klünne*) 'clumsy lout, lumpish fellow' (Bendsen):—OFris. type **klunda* wk. masc. Cf. NFris. insular dial. Amrum *klünj* (pl. *klünjar*) 'clod, clot, lump' = Sylt *klünd* 'clog, wooden mall':—OFris. type **klund* str. masc. Also mod.Icel. *klunni*:—**klunþi* 'clumsy boorish fellow' (Vigf.), 'en klods, ubehændig person' (Jonson), compared with Sw. dial. *klunn*, *kluns* (Rietz) 'clump, clog, log', and Da. dial. *klunds* = *klods* 'block, log, stump', also 'clown'. In Dutch also, Sewell (1766) has *kleun* fem. (marked as a 'low word') 'a hoidon or lusty bouncing girl', *kloen* n. with same sense; and he explains Eng. *clown* as 'een plompe boer, kinkel, *kloen*'. Bilderdijk *Verklarende Geslachtlijst* (1832) says that *kloen* applied to a man signifies *een lompert*, 'clown' in English, and so is it with *klont*, *kluit*, and *kluts* or *klots*, all meaning primarily 'clod, clot, lump'. So far as concerns the sense-development, then, it is clear that we have here a word meaning originally 'clod, clot, lump', which like these words themselves (see CLOD 5, CLOT 4), has been applied in various langs. to a clumsy boor, a lout. Of an OE. type, corresp. to the Fris., or to the Du. words, we have no trace, no more than of the occurrence in Eng. of the primitive sense 'clod'; and it is probable that in Eng. the word is of later introduction from some Low German source.]

III. A combination, association.

[This group of senses is closely connected with the vb.; but the evidence does not make certain what was the exact course of development. In particular, it does not appear whether a *club* in senses 13–15 was, in its origin, merely a knot or association of persons, or a 'clubbing' of the expenses of an entertainment, or of contributions towards it: see the verb senses 4–10, where the earliest example quoted (in 9) is connected with the joint defrayal of expenses. The order here followed is therefore merely provisional.]

† 11. A meeting or assembly at a tavern, etc., for social intercourse; a social meeting the expenses of which are jointly defrayed; *later*, a periodical social meeting of such an association as is described in 13 (to which the name *club* was soon transferred). *Obs.* (Johnson's explanation 'An assembly of good fellows, meeting under certain conditions', belongs here, unless 'assembly' was meant for 'association'.)

13. An association or society of persons of like sympathies, of a common vocation, or otherwise mutually acceptable, meeting periodically (under certain regulations) at some house of entertainment, for social intercourse and cooperation.

As to 'clubs' in this sense, which were a great feature of English life in the 18th c., see the Spectator 1711 No. 9. Associations of this sort still exist under the name; but, speaking generally, the 17–18th c. 'club' has developed in two directions; that mainly connected with entertainment having become a permanent institution as described in sense 15, while the occasionally or periodically meeting club has usually primary objects apart from conviviality, as in 14. (The first quotation may belong to sense 12.)

1670 COLLINS in Rigaud *Corr. Sc. Men* (1841) II. 526 Of two mathematical clubs here, one is a large one consisting of divers ingenious mechanics, gaugers, carpenters. *c* 1690 B. E. *Dict. Cant. They met at the Turk's Head, in Gerrard Street, Soho, one evening in every week, at seven. 1865 O. W. HOLMES in *Motley's Lett.* II. 10 Oct., What a fine thing it would be to see you back at the Saturday Club again.

14. An association formed to combine the operations of persons interested in the promotion or prosecution of some object; the purpose is often indicated in the title, as *Alpine, Athletic, Chess, Cricket, Football, Literary, Natural History Field, Tennis, Yacht Club*, etc.; *Benefit, Clothing, Coal, Goose Club*, etc.

Many of these are solely devoted to the object for which they are organized; others combine therewith some of the convivial features of sense 13, or even the permanent organization of sense 15. Here belong the publishing clubs, as the Abbotsford, Bannatyne, Roxburgh, Spalding, etc., which differ from *societies* with similar objects chiefly in their limitation of membership to a fixed number.

b. Short for BENEFIT CLUB. *colloq.* (Cf. *club-feast, -money* in 20.) *To be on the Club*: to receive relief from its funds.

15. An association of persons (admittance into which is usually guarded by ballot), formed mainly for social purposes, and having a building (or part of one) appropriated to the exclusive use of the members, and always open to them as a place of resort, or, in some cases, of temporary residence; the club may be political, literary, military, etc., according to the aims and occupations of its members, but its main feature is to provide a place of resort, social intercourse, and entertainment.

This is a natural development of the club of sense 13, which gradually grew till it monopolized the whole accommodation of the tavern or house at which it met, and the place became known as a 'club-house',—the club often bearing the name of the proprietor of the house. Later, in order to have the management of the house and their affairs in their own hands, some clubs started fully-equipped establishments of their own. The institution has developed into its most completely-organized form in London, where, especially in the vicinity of St. James's (colloquially called 'clubland'), are to be found the most perfect types of it.

1776 WALPOLE *Jrnl. Reign Geo. III* (1859) II. 39 Being excluded from the fashionable club of young men at Almack's they formed a plan for a new club..They built a magnificent house in St. James's Street and furnished it gorgeously. 1823 BYRON *Let. OE. *clympre*, CLUMPER. There is no evidence to show whether the English goes back with these to OLG. or WGer., or is of later adoption from LG. The stem *klump-* appears in ON. with another grade of the labial as *klumb-*, whence *klumba*, *klubba*, CLUB.

In sense 4 it is immediately derived from MDu. and MLG. *clumpe, klumpe*, Du. *klomp* a wooden

shoe, i.e. a shoe entirely shaped out of a lump of wood (as worn by the North German peasantry); which is a special application of the Du. and LG. word as given above. Klumb- was probably a nasalized form of **klub-*; comparing this with the stem *kulb-* of OHG. *cholbo*, OLG. **kolba* (MLG. and MDu. *colve*, Du. *kolf* 'club'), and ON. *kolfr* javelin, *kylfi*, *kylfa* 'knot, club', we are led to a pre-Teut. **glbh*, whence app. L. *globus* rounded mass, ball.]

Clutch (klʊtʃ), *sb.*¹ Forms: *α.* 3–6 cloke, *β. Sc.* 4–cluke, (5 clucke, 5–cluik, 7–8 clook, 8–cleuk). *γ.* 3–6 cloche, 6–7 clooch. *δ.* 5–6 clowch(e, 6–7 clouche, cloutch, 7 clowtch. *ε.* 7– clutch. [A word, or train of words, of difficult history. The earliest form exemplified is ME. *clōke*, Sc. *clūke*, of which the normal modern form would be *clook*. Of this, ME. *clōche*, 17th c. *clooch* (rime *brooch*), appears to be a palatalized southern form; but the conditions of the origin of this and *clowtch*, *clouch* (rime *pouch*), are obscure. *Clutch*, which since the 17th c. has superseded the other forms (exc. dial. *cloke*, *clook*, *cluke*), came in apparently from the verb CLUTCH, q.v. It is to be noticed that with the obsolescence of the earlier forms, the original literal sense of 'claw' also disappeared, and the senses now in use are mainly those of a noun of action from the verb.

For ME. *clōk(e*, normally we should expect an OE. **clóc*, *clóce*. But, as under BROOK *v.* we see a ME. *brōke* (beside *brouk*), from OE. *brūcan*, so here, ME. *clōke* (? beside **clouke*) may represent an OE. **clūc* or *clūce*. This would represent an OTeut. **klūka-* or *klūkōn-*, a deriv. of the vb. root **kluk-*, *kleuk-*, whence came **klukjan*, OE. *clyccan*, CLITCH, CLUTCH. Thus *clōke* would be ultimately related to these verbs. As we cannot on any phonetic principles explain the palatalized forms *clōche*, *clooch*, *cloutch*, it seems probable that these were produced by the influence of the vb. *clucche*, *clutch*, upon the sb. *clōke*, **clouk*, and that the sb. was thus brought gradually in form and sense into direct identification with the verb, as we see, under the verb, that the latter has also been brought in sense into closer association with the sb.]

Co, dial. form of COME *v.*

Co-, *prefix* of Latin origin. In Latin the preposition *com-* (which as a separate word was written in classical L. *cum*) was shortened to *co-* before vowels and *h*, also before *gn-*, e.g. *coalescere*, *coercēre*, *coortus*, *cohærēre*, *cognātus*. Partly from the greater syllabic distinctness of this form of the prefix, arising out of the natural break between it and the following vowel, whereby also, on the break-down of the older quantitative system, the *o* became a long vowel, partly from the readiness with which some compounds of this type, as *co-æquālis*, *co-adjūtor*, *co-episcopus*, *co-hæres*, *co-operātor*, *co-optāre*, were analysed into their elements, *co-* has come in English to be a living formative, the use of which is no longer restricted to words beginning with a vowel, but extended to all words of analogous kinds, including native English or other words, as well as those from Latin. The general sense is 'together', 'in company', 'in common', 'joint, -ly', 'equal, -ly', 'reciprocally', 'mutually'. It combines (like L. *com-*, *con-*, *co-*) with verbs, adjs., adverbs, and sbs. It is sometimes prefixed to words of L. origin which are already compounded with *com-* (*con-*), as *co-connexion*, *-conspirator*, *-constituent*.

It occurs also as a variant form of words of L. origin or type, where the regular form is *com-*, *con-*, *cor-*: e.g. *co-centric*, *co-natural*, *co-numerary*, †*co-partment*, *co-relation*, *co-rival*, *co-temporary*, *co-terminous*, and other occasional instances: cf. also *co-citizen*, *co-join*, *co-mingle*, with *concitizen*, *conjoin*, *commingle*, etc.

All the more important of these compounds appear in their alphabetical order as Main words: there follow here examples of compounds of rare occurrence and obvious meaning, or in which the combination is but for the nonce. It is notable how many of these are solely due to Bishop Ken.

Coach (kōutʃ), *sb.* Forms: 6 cochee, (cooch, coyche, cosche), 6-7 coche, coatch(e, 6- coach. [In 16th c. *coche,* a. F. *coche* (masc., in 16th c. occas. fem.). Found since 16th c. in nearly all European langs.: cf. Sp. and Pg. *coche,* It. *cocchio,* Wallachian *cocie*; Ger. *kutsche* (in 16th c. also *kotsche*), Du. *koets*; Boh. *kočí,* Pol. *kocz,* etc. All originally from Magyar *kocsi,* formerly also written *kotsi,* (pronounced kotʃi), 'ungaricum currum [quem] kotczi vulgo vocant' (anno 1560), used in Hungary from the reign of King Matthias Corvinus, 1458-90. *Kocsi* is in form an adjective, meaning app. 'of Kocs (kotʃ)' a place south of Komorn, between Raab and Buda; the full original name (still used in 18th century) being *kocsi szeker* i. e. 'Kocs cart' (car, wagon), rendered in Lat. in 1499 *cocius currus,* in 1526 *currus kotsi.* Hence, also, the early equivalents in other langs.: Boh. *kočí vůz* (Kotsh car), shortened to *kočí, koč*; Ger. 16th c. *cotschie-* or *cotschy wagen, cotzie wagen, gotschiwagen, gutschiwagen,* shortened to *gotschi, gutschi, gutsche, kotsche kutze, kutsche*; earlier Du. *kotsie-, koetsie-, koets-waghen,*

shortened to *kotsie* (Kilian), *koetsie*, *koets*. Cf. also 16th c. Eng. *cochee*. The Sp., Pg. and F. *coche*, were app. immediately from 16th c. Ger. *kotsche*.

1. A large kind of carriage: in 16th and 17th centuries, usually a state carriage of royalty or people of quality (still occasionally used, as *e.g.* the Lord Mayor's coach); now, usually, a large close carriage with four wheels, with seats inside, and several outside, used for public conveyance of passengers (see STAGE-COACH). Hence *to take coach* (obs.).

It does not appear certain what was the precise new feature that distinguished the Hungarian *kocsi*, and led to its adoption throughout Europe. A German picture of 'ein ungerische gutsche,' after 1550, shows it still without covering, and not suspended on springs. (Hildebrand in Grimm.)

1. A tabular projection left on the face of a scarfed timber, to fit into a recess in the face of another which is to be joined to it, so as to prevent slipping and make a stronger joint; especially used in the making of masts of several pieces. By the Thames shipbuilders called 'table', the operation being 'tabling'. ? *Obs.*
1794 *Rigging & Seamanship* I. 4 *Coaks* are oblong ridges left on the surface of different pieces of made-masts by cutting away the wood round them; the intermediate part is called the plain. ... Coak and plain is when a coak is formed, and a plain surface follows between that and the next. Running coaks are coaks continued the whole length along the middle .. Chain coaks are formed one at the end of the other on the opposite sides of the middle-line. 1867 Smyth *Sailor's Word-bk.* s.v. *Coaking*, Coaks, or dowels, are fitted into the beams and knees of vessels, to prevent their slipping.

Coarse (kōəɹs), *a.* Forms: 5 cors, corse, 6 cours, cowrse, (cowarce), 6-8 course, 7 coorse, 7- coarse. [First found early in 15th c. No corresp. adj. in Teutonic, Romanic, or Celtic. The general spelling down to the 18th c. was identical with that of the sb. Course; with that word it is still identical in pronunciation, both in standard English and in the dialects (*e.g.* Scotch *kurs*); the spelling *coarse* appears to have come in about the time when the pronunciation of *course* changed from *u,* u, to *o,* o. Hence the suggestion of Wedgwood that *coarse* is really an adj. use of *course,* with the sense 'ordinary', as in the expression *of course,* 'of the usual order'. It appears to have been used first in reference to cloth, to distinguish that made or worn in ordinary course from fine cloth or clothes for special occasions or special persons; 'course cloth' would thus be 'cloth of (ordinary) course'. Cf. the history of *mean,* and such expressions as 'a very ordinary-looking woman', a 'plain person'.

Our first contemporary example of the spelling *coarse* is in Walton 1653 (where *course* however also occurs[1]); it became frequent after 1700; *course* occurs occasionally down to 1800.]

Cob (kɒb), *sb.*[1] Also 5–6 **cobbe.** [Used in a number of senses having but little apparent connexion with each other, and possibly of diverse origin. The notions may be roughly distinguished of 'something big or stout', 'something rounded or forming a roundish lump', 'a head or top'; but these are intricately interwoven in individual senses. Thus *cob* = 'cob-nut', can hardly be separated from the notion of 'stout or big nut' on the one hand, or from that of 'fruit stone' on the other. So sense 1 appears sometimes to mean 'man at the *top*'.

It has been suggested that 'rounded head' is the radical notion, and that *cob* is a variant of Cop; but the history of the latter does not favour this. In some of the senses under II, *cobble*, *cobyll*, was an earlier equivalent, but these senses are closely connected with others which have no equivalents in *cobble*.]

Cock (kɒk), *sb.*[1] Forms: 1–3 coc, 1 kok, cocc, 4–6 cok, coke, 4–5 cokke, 5 cokk, kocke, 5–7 cocke, 4– cock. [OE. *cocc, coc, kok*; cf. ON. *kokkr* (rare, according to Vigfusson only once in Edda), and F. *coq* (13th c. in Littré).

Though at home in English and French, not the general name either in Teutonic or Romanic; the latter has derivatives of L. *gallus*, the former of OTeut. **hanon-*: Goth. *hana*, OS. and OHG. *hano*, MDu. *hāne*, Du. *haan*, MHG. *han*, Ger. *hahn*, ON. *hani*, Sw., Da. *hane*, OE. *hana* which scarcely survived into ME. Phonetically, it is possible that *cocc* is:—OTeut. **kukko-*, from same root as CHICKEN (**keukīno-*) viz. **keuk-, kuk-*. But its frequent early spelling in OE. with *k* (*kok, kokke*, etc., 4 times out of 5 in *Gregory's Past.*) looks rather as if it were considered foreign; for *k* is rare, except in foreign words. Also its use in one (later mixed) text of the Salic Law, vii. 6 (MSS. of 8–9th c.), 'si quis coccum aut gallinam furaverit' where other MSS. have *gallum*, and the Malberg glosses have *annas, cannas* for *channas*=original Teut. *han-*, rather favours its being Romanic. In any case, this shows *coccus* in the Latin of Northern Gaul, a century before the earliest known English instances. (Kilian 1577 has in Du. 'kocke *vetus* = haen', but the status of this is uncertain.) Wherever the name arose, it was prob. echoic: cf. sense 4.]

IV. Technical applications. [The connexion of some of these with this word is doubtful.]

12. A spout or short pipe serving as a channel for passing liquids through, and having an appliance for regulating or stopping the flow; a tap.

The origin of the name in this sense is not very clear: the resemblance of some stop-cocks to a cock's head with its comb, readily suggests itself; but some of the earlier quotations seem to imply that the power of closing the 'cock' was no essential feature, i. e. that a *cock* was not necessarily a *stop-cock*, but that the word simply meant a short spout for the emission of fluid; in others it appears to be=nozzle or mouthpiece. But in German, *hahn* has been used in the same sense for an equally long period, and an example of 1503 in Grimm has 'wenn es (ein kind) einen hän ufgewint, so louft der wein aller aus' (if the child turns a cock, all the wine runs out), clearly referring to a stop-cock.

Cock (kɒk), *sb.*[2] Also 5 cok, 5–6 cocke. [First known in 15th c. Agrees in form and sense with dial. Ger. *kocke* masc. heap of hay, also of dung; Norw. *kok* m. heap in general, *esp.* of dung, but also still more generally 'lump'; cf. ON. *kökkr* lump (*snæ-kökkr* snow-ball), Sw. *koka* fem. clod, clot. It is uncertain whether the narrower or the wider sense is the primitive: see Grimm s. v. (Connexion with the stem of Ger. *kug-el*, Du. *kog-el* 'ball', has been suggested.)

In the *Dictionnaire du Patois Normand, départem. de l'Eure* (1879) it is said, haycocks are generally called *villottes*; but about Berville (a little south of Rouen) a *villotte* of the smallest size, in which the hay is put up the first day, is called *une coque*, from its resemblance to the rounded shape of an egg-shell (*coque*). This may be the same word: the derivation offered is, of course, questionable.]

Johnson (copied in later Dicts.) has the sense 'The notch of an arrow', which he probably found in Ainsworth's *Thesaurus* (1746—) 'The cock of an arrow, *Sagittæ crena*'. No evidence has been found for such a sense: it appears to be an etymological figment founded on Skinner's conjecture that 'cock of a gun' (Cock *sb.*[1] 13) was a term originally proper to Archery, and identical with It. *cocca* 'the nocke of an arrow' (Florio).]

Cock (kɒk), *v.*[1] Formerly also cokke. [Here are included a number of separate uses, which appear all to be derived, in one way or another, from the name of the fowl. Even this derivation, however, is somewhat doubtful for the earliest sense, which has been conjecturally compared with Irish *cog-aim* 'I war, I make war', stem in OIr. *coc-*.]

But the first appearance of the word is in Rabelais, in the phrase *bonnet à la coquarde*, explained by Cotgrave (1611) as 'a Spanish cap, or fashion of bonnet vsed by the most substantiall men of yore . . also, any bonnet, or cap, worne proudly, or peartly on th' one side'. Here *coquarde* appears to be the fem. of *coquard* adj. 'foolishly proud, saucy, malapert', as sb. 'a malapert coxcomb' (Cotgr.).]

Cock-a-hoop. Also 6-7 cock on (the) hoope, (hope, houpe), 7 cock in hoope, 9 cock-a-whoop. [A phrase of doubtful origin, the history of which has been further obscured by subsequent attempts, explicit or implicit to analyse it.

Blount, *Glossographia* (1670), says '*Cock-on-hoop*; our Ancestors call'd that the *Cock* which we call a Spigget, or perhaps they used such *Cocks* in their vessels, as are still retained in water-pipes; the *Cock* being taken out, and laid on the *hoop* of the vessel, they used to drink up the ale as it ran out without intermission (in Staffordshire, now call'd Strunning a barrel of Ale) and then they were *Cock-on-Hoop*, i. e. at the height of mirth and jollity; a saying still retained'. This account fits the use of the phrase in the 16th c.; but it has more the appearance of an inference from the phrase itself, than of an independent statement of historical facts. For we have no clear evidence that 'cock' ever meant a spigot, and even if it did, the use of the 'hoop' of the cask as a place on which to lay it, seems to require further elucidation. The matter is perplexed by the occurrence of a 'hoop' and of figures 'on the Hoop' in tavern-signs from a much earlier date. Thus the 'George on the Hoop' is said by Hotten and Larwood *Hist. Signboards* (ed. 3) 503, to be mentioned in Clause-Roll 43 Edw. III, and later are found the 'Hart', 'Swan', 'Eagle', 'Falcon', 'Cock', 'Hen' 'on the Hoop', also the 'Crown', 'Bunch of Grapes', 'Mitre', 'Angel', 'Bell', each 'on the Hoop'. Some of these signs still exist; but it is difficult to see what bearing they have on the phrase as originally used, or how the 'Cock on the Hoop' as a sign should have given rise to a phrase, more than any of the other devices similarly found 'on the Hoop'; still more is it difficult to imagine how this cock could be set on or taken off the 'Hoop' in connexion with a drinking bout. Equal difficulty attends various other suggested explanations of 'hoop', none of which affords the slightest clue to the 16th c. use.

Since the 17th c. 'cock' has been generally identified with the live fowl, which has led to changes both in the grammatical construction and use of the phrase; in accordance with this also, 'hoop' has been vaguely referred to F. *huppe* tufted crest, (a guess of Phillips), and identified with 'whoop', as in *war-whoop*; these are merely popular etymologies, but they have affected the use of *cock-a-hoop* by persons who believed in them. The following passages illustrate these remarks.

1403 *Add. Charter* 5313 Br. Mus., A messuage called 'the belle on the hoop'. 1631 *Deed* (in J. Coleman's *Book Catalogue* 1889) relating to 'two Inns in Shoreditch, one called the Cock and Hoope, and the other the Holy Lambe'. *a* 1637 B. JONSON *Eng. All upon the Spur, high in mirth, or standing upon high terms. 1793 W. ROBERTS *Looker-on* (1794) II. 73 No. 39 The Cock on the Hoop may be seen also in Holborn, printed on a board.]

Cockatrice (kɒ·kătrəis, -tris). Forms: 4–7 coc-, cok-, 5- cockatrice; also 4–5 koc-, kokatrice, 5 cocatryse, coc-, cock-, cokautrice, 5–6 cokatryce, 6 cockeatrice, coccatrice, -trise, cockatryce, -tryse, 7 cockatrise. [ME. *cocatris, -ice*, a. OF. *cocatris* (also *coc-, coqu-, kok-, cauc-, chocatrix, -atriz, -atris, caucatri, cocastris, qualquetrix*) masc., corresp. to Pr. *calcatriz*, It. *calcatrice* (1266) fem., repr. L. **calcātrix, calcātrīcem* (cf. *caucatrices*, in Du Cange), app. a mediæval rendering of Gr. *ἰχνεύμων* ichneumon. This last (= *ἰχνευτής*) meant literally 'tracker, tracer out, hunter out', f. *ἰχνεύ-ειν* to track, trace out, hunt out, f. *ἴχνος* track, footstep. L. *calcātrix* is fem. agent-sb. of *calcāre*, orig. 'to tread', in med.L. 'to tread on the heels of, track, trace out' (f. *calx, calcem* heel). Thus *calcātrix* came to render *ichneumon.* (Prof. Thor Sundby, *Brunetto Latino's Levnet og Skrifter*, Kjöbenhavn, 1869, p. 142–4.) In OF. the word was partially popularized, as seen by the phonetic change of the original *calc-* through *cauc-* to *cauc-, coc-*, and *chauc-, choc-.* (In Sp. it occurs only as adopted from Fr., viz. *cocatriz* (Nebrija 1512), *cocadriz* (Minsheu), *cocotriz* later dicts.)

The sense-history of this word is exceedingly curious. The Ichneumon, an Egyptian quadruped, said to devour reptiles and crocodiles' eggs (which it searches for in the sand), is called by Pliny VIII. 24 (35) § 88 sq., the mortal enemy of the aspis and the crocodile. As to the latter, he tells that when the crocodile is asleep or dozing with its jaws open, the ichneumon darts down its throat, and destroys it by gnawing through its belly; a tale originating, partly at least, in the habits of the bird *trochilus*, as mentioned by Herodotus and subsequent Greek writers, and repeated in many forms by later compilers. From an early period, Western writers entertained the notion that this ichneumon was amphibious or aquatic; the immediate followers of Pliny appear to have identified it with the Otter (in Gr. *ἐνυδρίς*). Pliny's tale is repeated by Solinus (flor. *c* 260) *Collectanea* xxxii. 25 (ed. Mommsen 160), and Isidore (*a* 640) *Orig.* XII. ii. 36: in the text of Solinus known to Ammianus Marcellinus (*c* 400), the animal is called '*enhydros*, the second kind of the ichneumons (enhydros alterum ichneumonum genus)'; while Isidore appears to make two distinct animals, the Ichneumon which 'serpentes insequitur..adversus aspidem pugnat', and the Enhydros 'a little beast so called because it lives in the water, and mostly in the Nile (Enydros bestiola, ex eo vocata, quod in aquis versetur, et maxime in Nilo)'. But the Gr. *ἔνυδρις* was not only the *otter*, but also a *water-snake=hydrus*; and the latter was the only sense in which *enhydris* had been used by Pliny. Later compilers took this to be the sense of *enhydrus, -os*, in Solinus and Isidore, and the crocodile's enemy was now described as a 'water-snake' or 'fish'. Thus it appears in Albertus Magnus (1193–1280) *De Animalibus* XXV. (VII. 669) as 'hidra vel hydrus serpens omnium serpentum pulcherrimus .. Apparet autem in Nilo flumine, et quum crocodilus dormit', etc., as in Pliny. Meanwhile also the latinized name *calcatrix* comes into view. It is found, along with the transformed description, in the version of the story given (*c* 1263) by Brunetto Latino in *Li Livre dou Tresor* 185 (ed. Chabaille), where it is said 'then comes another fish, which is named *hydrus*, that is *cocatris*, and enters within his body (lors vient un

autres poissons, qui a nom ydre, ce est cocatris [*v.r.* qualquetrix] et li entre dedans le cors)'; further 'and you must know that cokatrix, albeit he is born in the water, and within the Nile, he is not at all a fish, but is a water-serpent (Et sachiez que cokatrix jà soit ce qu'il naist en l'aigue, et dedans le Nile, il n'est mie peisson, ainz est serpens d'aigue)'. It has been suggested that, in this, the ichneumon was confounded with another reputed enemy of the crocodile, the *varanus*, or Monitor of the Nile, which is really a reptile. The *cocatris = ichneumon = enhydris = hydrus*, having thus been transformed into an aquatic reptile, living in the Nile, other writers proceeded to identify it with the crocodile itself. The *Bestiaire divin* of Guillaume le Normand (*c* 1210) makes *coquatrix* the crocodile, and *ydrus* his enemy: and in the *Bestiaire* of Richard de Fournival (*c* 1250) we have 'Vous m'avez fait mention en votre requeste d'un chocatrix, qui est apelez par son droit non cocodrilles'—'you have mentioned a *chocatrix*, but he is called by his right name *crocodile*'. And in later French, as well as in other Romanic langs., 'crocodile' became, at least, one of the recognized meanings of *cocatrix*. This confusion may have been helped in some instances by the fact that *cocodrille*, one of the commonest of the early forms of *crocodile* (see that word), had an initial similarity to *cocatrix*, and may have been taken by the ignorant as only another form of the name.

In English the confusion with *crocodile* hardly appears, except once or twice as a literalism of translation. Here, *cocatrice* appears from the first as the equivalent of L. *basiliscus*, or *regulus* = Basilisk. It was thus used by Trevisa in his translation of Bartholomæus Anglicus *De Proprietatibus Rerum* to render *basiliscus*, and, what was more important, by Wyclif and his followers to translate *regulus* (Isa. xi. 8, xiv. 29, lix. 5), and *basiliscus* (Ps. xc[i]. 13) of the Vulgate. In the former of these (also in Jer. viii. 17) it was retained in the 16–17th c. versions; but in the revised text of 1885, has been changed to *basilisk*. The history of this further transition of sense is still obscure; but it is to be noticed that *cocatrice* translates F. *basilicoc*, and that *coc* is app. a connecting link. But some traditional notions of the ichneumon as the enemy of the *aspis* (which appeared later in the well-known statement that the only animal which could kill the basilisk was the *mustela* or weasel) were probably contributory, as well as the mediæval confusion, under the name *regulus*, of the basilisk (*rex serpentium*) with the trochilus (*rex avium*, OF. *roytelet*, in mod.F. *roitelet* 'wren'): cf. Aldrovandi *Opera* (Bologna) X. 361.

Further etymological speculation, in France or England, working upon the syllable *coc*, *coq*, in *basili-coc*, *coc-atris*, probably also associating the crested basilisk with the crested bird, and mingling with it vague notions of the crocodile's eggs, buried in the sand, and producing a tiny reptile, originated the well-known notion of 'a serpent hatched by a venemous reptile from a cock's (i.e. *basilicock's* or *cok-adrill's*) egg', embodied in the heraldic monster, half cock, half serpent. As told of the basilisk, this appears already in Albertus Magnus (who however disbelieves it), in Bartholomæus Anglicus, etc. (See Thor Sundby, above cited; also Solinus, with Commentary, ed. Salmasius 1689, Cahier & Martin *Mélanges d'Archéologie* II. 213.)]

Cocker, *sb.*[3], **coker.** [app. f. Cock *v.*[3] + -er.] Originally, one who puts hay in cocks, a hay-worker; also, later, a harvest labourer. (The spelling *coker* has given rise to the unhistorical conjecture, that the original meaning was 'a charcoal maker who comes out at harvest-time'.)

Cocker (kɒ·kəɹ), *v.*[1] Also 5–6 coker, 6 koker, cokker. [Found only since 15th c.; origin obscure. Cf. however the 16th c. equivalent Cockle *v.*[3], which is identical in form and sense with a 16th c. Du. *kokelen*, *keukelen* 'nutrire sive fovere culina' (Kilian), *i. e.* to nourish or foster in the kitchen; but it is doubtful whether the Du. word was connected with *kokene* 'kitchen' exc. by 'popular etymology'. Cf. also obs. F. *coqueliner* (*un enfant*) to dandle, cocker, pamper, a child (Cotgr.). The Eng. *cocker* and *cockle* have the form of iterative diminutives of Cock *v.*[5], and the whole were prob. derivatives of Cock *sb.*[1], with the notion 'to make a nestle-cock, chick (L. *pullus*), or darling of'. Cf. etymological note to Cockney.

Some have thought this word identical with the next (which has also a variant *cockle*); but nothing has been found to support this suggestion. (Welsh *cocr*, and *cocreth* given in Llwyd 215 a, are from Eng.)]

The transferred sense evidently referred to the elation of a child in such a position.]

Cotgr. has F. *coquiol* 'a degenerate Barlie, or weed commonly growing among Barlie, and called haver-grasse', which M. Joret identifies with *coquiole*, 'Festuca ovina'.

1. The name of a plant: now, and prob. from OE. times, applied to *Lychnis* (or *Agrostemma*) *Githago*, a caryophyllaceous plant, with handsome reddish-purple flowers succeeded by capsules of numerous black seeds, which grows in cornfields, especially among wheat. Also called *Corn Cockle.*

Known to early herbalists as *Nigella* or *Nigellastrum*, F. *nielle*. *Nigella* (dim. of L. *nigra* black, referring to the black seeds) was app. originally applied to a ranunculaceous plant, *Nigella arvensis* (or one of its congeners), a field-weed of southern regions; but in northern France and Britain, where this plant was unknown, the name was transferred to *Githago*, the black-seeded corn-weed of these regions.

2. Applied from OE. times to render or represent the *zizania* of the Vulgate in Matt. xiii, or the *lolium* with which Latin writers identified this.

Recent investigation has apparently settled that the ζιζάνιον, pl. -ια, of the N.T., *zizania* and *lolium* of Latin writers, was the grass *Lolium temulentum* or Darnel, a prevalent weed in Mediterranean and Levantine regions (cf. Stanley *Sinai & Palestine* 426, Tristram *Nat. Hist. Bible* 487), which is very prone to be affected with *Ergot*, and in the ergotized condition is deleterious. The translation of these words by *coccel, cockle*, in English was (like the later erroneous rendering *tares*) due in the first instance to ignorance as to the plant meant by *zizania* or *lolium*; but it led to the further error of some scientific writers who, knowing *lolium* to be darnel, still called it 'cockle'.

[The derivation suggested above satisfies the form: *ey, ay* (*ai*), are regular ME. forms of *egg*, riming with the same words (*day*, etc.) as *cokenay* itself; *coken* genitive pl. is as in *clerken conceitise, P. Pl.* B. iv. 119, and in many similar instances; the use of the gen. plural is as in Ger. *hühnerei*, fowls' egg, *hahnenei* cocks' egg. The stress on *ay* retained in verse to 16th c., and supported by Minsheu's *cock neigh*, also accords with this composition of the word.

Of sense 1, the meaning appears to be established by the first quot.; the constituents of a COLLOP (q.v.) were precisely bacon and an egg. This meaning also completely explains the quot. from Heywood; that from the *Tournament* is perhaps (as already suggested by Wright) satirical or jocose. The matter appears to be clinched by the quot. from Florio for *cockan-eggs*. To account for the appellation, we might suppose *coken-ay* to be originally a child's name for an egg (cf. what is said of *coco* below); but as *cocks' eggs* and the equivalent Ger. *hahnenei* are at the present day applied in popular or dialect speech to small or malformed eggs (formerly imagined to be laid by the cock), it is not improbable that this was originally the specific sense of *cokenay*. The old notion that such eggs produced a serpent (see COCKATRICE) is well known; but no trace of this appears in the popular use of *cokenay*.

The application of either a child's word for an egg, or of the name of a small or mis-shapen egg, as a humorous or derisive appellation for 'a child sucking long', a 'nestle-cock', a 'milk sop', obviously explains itself; and the sense-development from 2 onward is clear and certain. A valuable contribution to the history of these senses is made by H. H. S. Croft, in the Glossary to his ed. (1883) of Elyot's *Gouernour*.

An apparent parallel is the French word *coco* 'a child's name for an egg', also a term of endearment applied to children, and of derision applied to men: *mon petit coco, quel grand coco! Coco*, considered by Littré a deriv. of *coq*, was app. the source of *coconellus* (dim. of **coco, cocōnem*) given in the Promp. Parv., with *cucunellus*, as med. L. translations of *cokenay*, and stated to be 'ficta et derisorie dicta', 'derisorie ficta et inventa'. And *cocnellus*, in turn, appears to be the origin of the 16th c. Eng. COCKNEL, given above, as an exact equivalent of *cockney*, senses 2, 4. On F. *coco* was formed the verb *coqueliner* 'to dandle, cocker, fedle, pamper, make a [cockney or] wanton of (a child)', just as *dodo* a word like Eng. 'by-by' or 'ba-ba', sung to lull a child to sleep, gave *dodeliner* to perform this action. It is to be noted also that, from the earliest times, *cokenay* 2 was constantly associated with the vb. *coker* COCKER, both in use (see quots. in 2), and in L. and Fr. explanations e. g. 'cokeryn, *carifoveo*; cokenay, *carifotus*', Promp. Parv., 'I coker *je mignotte*; I bring up like a cocknaye *je mignotte*' Palsgr. If *cocker* was, as it appears to be, a derivative of *cock*, this association was natural and obvious.]

Cock-sure (kɒ̓kˌʃūəˑɹ), *a.* (*adv.*) [According to the regular force of similar formations, e. g. *stone-deaf, clay-cold, dog-sick, dirt-cheap, coal-black*, etc., the sense ought to be 'as sure as a cock'. The conjecture that there is some allusion to *cockish, cocky*, with reference to 'pert self-confidence', being founded upon the latest sense, which is only a modern development, is not historically tenable. The word was originally perfectly dignified, and habitually used in the most solemn connexions. And, in early use, the sureness in question was *objective*, i. e. 'as secure, safe, certain, trustworthy, reliable, etc., as can be': this makes it possible that the original reference may have been to the security or certainty of the action of a cock or tap in preventing the escape of liquor, or perhaps of a cock with a removable turning-key (if these go far enough back) in leaving the contents of a tun secure from interference.

The notion 'as sure as a cock is to crow in the morning', has also been suggested. It might suit sense 2, but not sense 1.]

I. Of objective sureness, security, or certainty.

Coco, cocoa (kō·ko). Forms: α. 6 cocus, 6–7 cocos; β. 6–7 coquo, (6 caco, coeco), 6–coco; γ. 7 coquer, cocar, cocker, 7–8 cokar, 7– coker; δ. 8–9 cocoa. [a. Pg. and Sp. *coco*; in 16th c. L. *cocus*. The early writers, from Cosmas 545 to the 15th c., knew it only as the *Indian nut* or 'nut of India'; *coquos* (plural) is quoted first from the *Roteiro de Vasco da Gama* (Portuguese, 1498–9); Barbosa 1516 has (Pg.) *quoquos*; Pigafetta 1519 has (It.) *cochè* pl. of *coca*; Oviedo 1526, Barros 1553, Garcia 1563, and Acosta 1578 have *coco*; Correa 1561 *coquo*.

The Portuguese and Spanish authors of the 16th c. agree in identifying the word with Pg. and Sp. *coco* 'grinning face, grin, grimace', also 'bugbear, scare-crow', cognate with *cocar* 'to grin, make a grimace'; the name being said to refer to the face-like appearance of the base of the shell, with its three holes. Historical evidence favours the European origin of the name, for there is nothing similar in any of the languages of India, where the Portuguese first found the fruit; and indeed Barbosa, Barros, and Garcia, in mentioning the Malayalam name *tenga*, and Canarese *narle*, expressly say '*we* call these fruits *quoquos*', '*our people* have given it the name of *coco*', 'that which *we* call *coco*, and the Malabars *tenga*'.

In Eng. the latinized form *cocus*, afterwards (as in Bot. Latin) *cocos*, was at first used, both for sing. and plural. Towards the close of the 16th c. *coquo, coco*, as 'the Portingalls cal this fruit' (Linschoten), began to be used, with pl. *cocos, cocoes*. *Coco* remained the established spelling in the 18th c., till the publication of Dr. Johnson's Dictionary, in which the article *Coco* was (app. by some accident, for Johnson in his own writings used *coco*, pl. *cocoes*) run together with the article *Cocoa* (= *Cacao*); this gave currency to a confusion between the two words which still prevails, although careful writers have never ceased to use the correct form *coco*.

Another spelling, *coker*, has been used, with various modifications since about 1620 (Purchas has *cokers*, Burton *coquer-nuts*); it appears to be from 17th c. Dutch *koker-noot*, and has long been in commercial use at the port of London to avoid the ambiguity of *cocoa*.

The Greek words κοῦκι and κόϊξ applied by Theophrastus, and, after him, by Pliny (*cūci, coix*), to certain palmaceous trees, have both been suggested as sources of the name, but without any ground, except their distant resemblance to *coco*. Connexion with Sp. *coca*, F. *coche*, and the family of L. *concha* shell is also philologically untenable.]

5. Double Coco-nut, in Fr. *coco-de-mer, coco-des-Maldives*, the immense woody nut of a gigantic palm *Lodoicea sechellarum*, found native only on the small islands, Praslin and Curieuse, of the Seychelles group. The fruit weighs 40 or 50 pounds, is covered with a thick fibrous husk, and contains from one to three stones, or 'nuts', about 28 inches long, covered with excessively hard and thick black shells, each divided half-way down into two lobes, whence the name.

Before the discovery of these islands in 1743, the source of these nuts, which were often found floating on the Indian Ocean, or thrown up on the shores of the Maldive Islands, was enveloped in mystery and fable.

Cocoa (kō·kō). [A corruption of Cacao, in 16-18th c. also written cacoa, and sometimes in 18th c. cocao. *Cacao* was the Spanish adaptation of *cacauatl* (or rather of its combining form *cacaua-*), the Mexican name of the cacao-seed.

The word was orig. of 3 syllables, *ca-ca'-o, co-co'-a*, but the error of spelling *coco* as *cocoa* has led to the further corruption of pronouncing *cocoa* as *coco*.]

Codling[2] (kɒ·dlin), **codlin** (kɒ·dlin). Forms: 5 querdlyng, qwerdelyng, 6 codlyng, 6–7 quodling(e, quadling, 7– codling, codlin. [The later forms *quodling*, *codling*, are perh. corruptions of the earlier *querdling*. The latter is explained in the Promptorium as *duracenum*, app. L. *dūracinus*, *-um* 'hard-berried, hard', orig. said of the grape, hence of other fruits, as peaches, cherries, etc. Assuming that *querdling* had a meaning corresponding to this, it has been suggested that it might be a derivative of ME. *quert* 'sound'; though this is not very satisfactory either in form or in sense.

Palgrave's explanation *pomme cuite*, and Skinner's *pomum coctile*, together with the very frequent references in the 17th c. to the coddling of apples or pippins (see CODDLE *v.*[1]), and the frequent spelling of the latter with *qu-*, seem to show that the two words were thought to be connected. But the form *querdling*, the late appearance of the verb *coddle*, and want of early examples of a descriptive phrase 'coddling apple', all tend to indicate that this association was non-original and incidental.]

1. A variety of apple, in shape elongated and rather tapering towards the eye, having several modern sub-varieties, as Kentish Codling, Keswick Codling, etc.

From the beginning the name seems to have been applied to a hard kind of apple, not suitable to be eaten raw; hence to any immature or half-grown apple. In the beginning of the 17th c. it was applied to a variety suitable to be cooked while still unripe; but the peculiar codling shape appears to have determined the modern application.

(The alleged sense 'green peas' in Halliwell appears to be founded solely upon a conjecture of Gifford's on the following passage, and that in *Sun's Darling* (CODLING[2] 1 c) for 'hot codlings', which he also took for 'peas'. If 'coddled' or roasted peas (CODDLE *v.*[1] 2) were ever called *coddlings*, this may be the sense here; but evidence is wanting. 2. *Math.* a. *Algebra.* A number or quantity placed (usually) before and multiplying another quantity known or unknown.

[According to Hutton, Vieta, who died in 1603, and wrote in Latin, introduced *coefficiens* in this sense.]

Thus in $4x^2+2ax$, 4 is the coefficient of x^2, 2 of ax, and $2a$ of x. Coefficients are sometimes distinguished as *numerical* (i. e. represented by arithmetical figures) and *literal* (i. e. represented by algebraical letters).

c. *Differential coefficient*: the quantity which measures the rate of change of a function of any variable with respect to that variable.

1708–15 KERSEY, *Coefficient of any generating Term* (in *Geometrical Fluctions*) is the Quantity which arises by dividing that Term by the generated Quantity. 1855 WALLACE in *Encycl. Brit.* (ed. 8) IX. 688/2 The expression $\frac{du}{dx}$ is called the first differential co-efficient of the function u, or the differential co-efficient of the first order. 1875 TODHUNTER *Diff. [ad. Arab. قهوة *qahwah*, in Turkish pronounced *kahveh*, the name of the infusion or beverage; said by Arab lexicographers to have originally meant 'wine' or some kind of wine, and to be a derivative of a vb.-root *qahiya* 'to have no appetite.' Some have conjectured that it is a foreign, perh. African, word disguised, and have thought it connected with the name of *Kaffa* in the south Abyssinian highlands, where the plant appears to be native. But of this there is no evidence, and the name *qahwah* is not given to the berry or plant, which is called بُنّ *bunn*, the native name in Shoa being *būn*.

The European langs. generally appear to have got the name from Turkish *kahveh*, about 1600, perh. through It. *caffè*; cf. F., Sp., Pg. *café*, Ger. *kaffee*, Da., Sw. *kaffe*. The Eng. *coffee*, Du. *koffie*, earlier Ger. *coffee*, *koffee*, Russ. *kophe*, *kopheĭ*, have *o*, app. representing earlier *au* from *ahw* or *ahv*.]

†**Cog,** *sb.*[1] *Obs.* (exc. *Hist.*) Forms: 4 coge, kogge, 4-6 cogge, 4- cog. [ME. *cogge, kogge* (14th c.), corresponds in form and meaning alike to OF. *cogue*, (*coge, koge, cogghe, guogue*), also *coque*, a kind of ship, *esp.* 'ship of war' (Godefroy), and to MLG. *kogge* m. f., MDu. *cogghe* (Du. *cogge, cog* f.), MHG. *kocke*, 15th c. G. *kock* (OHG. *coccho* m.). With the latter cf. Teutonic etymologists consider these words to be native, going back to OTeut. types **kuggon-*, **kukkon-*. The OF. forms on the other hand are usually taken as cognate with Pr. *coca, coque*, Sp. *coca*, obs. It. *cocca*, 'a kind of ship no longer in use, which had the prow and the poop much raised, with a single mast, and a square sail' (Della Crusca), derived by Diez and others from a L. type **coccha*, by-form of *concha* lit. 'shell', also, in late or med.L., a species of boat or ship. The relations between the Teutonic and the Romanic, and esp. the OF., words are uncertain. The probability is that the ME. word was from French rather than LG.: like the Fr. it interchanged at an early date with *cocke*, COCK[3], which afterwards was differentiated, and used only in sense of the Fr. dim. *coquet* cock-boat.]

Derivation from the Romanic family of F. *coche*, ONF. **coque*, Pr. *coca*, It. *cocca* 'notch', of which the sense has been considered allied, is phonetically untenable.]

1. One of a series of teeth or similar projections on the circumference of a wheel, or the side of a bar, etc., which, by engaging with corresponding projections on another wheel, etc., transmit or receive motion.

Cogs are either separate wooden pieces attached by mortices and the like, or are cut out of the substance of the wheel, or cast in one with it. The name was probably first given to the wooden pins inserted sideways into the rim of a wheel, which caught the rungs or trundles of a lantern-wheel; hence *cog and round*, a mechanical arrangement of this type. *Hunting cog*: in cogged wheels which have a certain proportion to each other, an extra cog given to the larger, by which there is secured

a continuous change of cogs engaging with each other and consequently equal wear.

Cog, *v.*[2] *Carpentry.* [cf. COCK *v.*[3] which appears to be the original form of this word, the present form being app. due to association with the *cogs* of a wheel, and with COG *v.*[1], to which this has a superficial appearance of relationship of sense.] To connect timbers by means of a 'cog'; cf. COCK *v.*[3] Hence **Co·gging** *vbl. sb.*

1823 P. NICHOLSON *Pract. Build.* 129 *Cocking*, or *cogging*, is the form of the joints, which the tie-beams and wall-plates make with each other. 1854 *Archit. Publ. Soc. [This vb. and the corresponding COG *sb.*[4] appear together in 1532, as 'Ruffians' terms' of dice-play; whence they passed into general use in various transferred senses. As in other cant terms, the origin has not been preserved; but the persistent notion is that of dishonest or fraudulent play, cheating.]

1. *intr.* (*Dicing.*) To practise certain tricks in throwing dice.

From contextual evidence it would seem that 'cogging' generally designated some sleight of hand, made use of to control the falling of a die; occasionally it may mean the substitution of a false die for the true one. The notion that it meant 'to load the dice' appears to be a mistake of modern dictionaries, which has, however, strongly influenced the use of the word by modern novelists, etc.; cf. esp. COGGED *ppl. a.* The following quotations show the change of explanation in the Dicts.: *c* 1690 B. E. *Dict. Cant. Crew, Cog*, to cheat at Dice; *Cog a Die*, to conceal or secure a Die. 1730-6 BAILEY, *Cog*, to conceal a Die, or by Art to make it come up what Number one will have. 1755 JOHNSON, *To cog a die*, to secure it, so as to direct its fall; to falsify. 1532 *Dice Play* (1850) 28 When fine squariers only be stirring, there rests a great help in cogging; that is when the undermost die standeth dead by the weighty fall of his fellow; so that if vi be my chance and x yours, grant that upon the die I cogg and keep alway an ace deuce or tray, I may perhaps soon cast vi, but never x. 1545 ASCHAM *Toxoph.* (Arb.) 54 What false dise vse they? as dise stopped with quicksilver and heares..and if they be true dise, what shyfte will they make to set ye one of them with slyding, with cogging, with foysting, with coytinge as they call it. 1586 NEWTON tr. *Danæus' Diceplay* vi, Any cogging panion, or shifting mate, that .. goeth about to .. strike the dyce. 1594 LYLY *Moth.
